ATTENTION: TO #ONE BOSS OF AMATEUR RADIO WORLD

Dear Sirs:

I wish to voice my opinion on the upcoming changes to the Amateur General Examination. I am in favor of terminating Morse Code for Amateur General and upgrading more talking privileges for Amateur General.

Due to previous test having been taken in 1998 (Amateur General – written test and code test) and passing it and two of the VEC's went to heaven in the same year I took the test, the test was mailed in late. You returned the tests stating they were too old. Can you reconsider and grant me the upgrade to Amateur General. Now do I have to take a written exam again, and exactly what is the passing score 70% or 100% right? I am enclosing a copy of my current license. Please mail me your comments.

I am proposing changes in the 80-meter band. It is now at 3850 – 4000 khz PH and

- 1) moving it to 3800 – 4000 khz PH,
- 2) 7225 – 7300 khz PH moving it to 7200 – 7300 khz PH
- 3) terminating Morse Code on 2 meters and 6 meters.

Please inform me of the results of the upcoming changes.

Respectfully,

Fred P. Wagner
